INTEREST

Web Developing

EXPERIENCE

Designed and implemented responsive, user-friendly web pages using HTML and CSS, ensuring cross-browser compatibility and adherence to web standards. Developed websites along with functional, handy, dynamic, interactive features with JavaScript, enhancing the user engagement and experience. Built modular and reusable components with React.js, leveraging hooks and state management for efficient data handling. Made interesting projects like Times table game, a calculator, a todo task and many more Optimized web applications for maximum speed and scalability, preventing lazy loading and code splitting techniques. I have a personal portfolio site to showcase my projects and skills, implementing smooth animations and responsive design technique
